**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --****Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 10-16, 24-50 are rejected under 35 U.S.C. 102(e) as being anticipated by Fanous et al., U.S. Patent # 6,586,996 B2.

Figs. 4, 5B-8B, 14, 15, and 17 of Fanous et al. discloses a circuit comprising: in Fig. 14, differential amplifiers 1408, 1410, 1412 can be read as a plurality of active circuits or means for producing the plurality of output signals; input signal to differential amplifier 1404 can be read as a received input signal; output signals at outputs of 1408, 1410, 1412 can be read as a corresponding split output signal; transformer at input of differential amplifier 1404 can be read as means for receiving the input signal; AGC circuit 1406 can be read as a controller.

Regarding claims 15, 46, differential amplifier 1404 can be read as a first gain stage or means for amplifying the input signal prior to its being split into a plurality of output signals.

Regarding claims 28 and 30, see Figs. 5B - 8B.

Regarding claim 41, in Fig. 15, input signals to amplifier 1502 can be read a first input signal; input signals to amplifier 1504 can be read a second input signal; amplifiers 1520 can be read as a plurality of first active circuits; amplifiers 1522 can be read as a

plurality of second active circuits; amplifier2 1502 and 1504 can be read as a first gain stage; AGC circuit 1406 can be read as a controller.

***Allowable Subject Matter***

Claims 3-9, 17-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
